Dear FCC Commissioners & Staff:

I find it deplorable that you would consider removing independent ISP's from the broadband internet loop.

Without independent ISP's the internet might never have come into existence. I remember the phone companies fighting the internet revolution because it tied up their phone lines. Now you want to leave the advancement of the internet to these very phone companies and you also want to remove from our choice the companies that built it.

Shame on you for even considering this very unamerican act.

Sincerely,

Chet Massie 1815 Kline Ct. Louisvlle, KY 40205
